TIMEDOCK

Checked in your crew? Dock them in.

Simple mobile clocking for crews.
Scan people into work from a phone,
then see the hours in the Dashboard.

Built for work away from base.
Add a Machine whenever it fits.

Keep your crew moving.

sales@timedock.com / timedock.com

Your team docks in. Wherever work starts.

Turn a supervisor's compatible iPhone or Android phone into a crew time clock.

Mobile App screen illustration. Interface may vary by device and version.

1 Open the Mobile App

Set up the phones used by your supervisors or team leaders.

2 Scan the team's QR cards

Scan each person's QR card when they start and finish. The whole team does not need the app.

3 See the hours in the office

Time entries sync to the same Dashboard, ready for review and payroll preparation.

A practical fit for work away from base.

Site crews, installers, landscapers and teams who move between jobs during the week.

Start mobile. Add a Machine when it helps.

A dedicated Machine can complement your team without changing the office workflow.

1

A simple option at base

Use a dedicated Machine at your regular workplace. Each person tags in with their own card or key fob.

2

All of your people. One Dashboard.

Machine and Mobile App time entries appear in the same Dashboard. A Machine is optional: you can use the Mobile App on its own.

TIMEDOCK CUSTOMER / COZY NZ

A Machine at the workshop. The Mobile App in the field. Hours together in one Dashboard.

The double-glazing business uses a Machine in its workshop and the Mobile App for installation teams.

Different workplaces. One Dashboard.

Choose the docking point that suits the work. Keep one view of the hours.

Tag in at base

Use a dedicated Machine at your regular workplace. Each person tags in and out with their own card or key fob.

Illustrative worksite scene.

Scan the team in on site

A team leader or designated person can scan the team in with the Mobile App. Their hours join the same Dashboard.

Choose how each team docks in. Keep one view of the hours.

No fingerprints. No face scans.

Scan your team's QR cards with the Mobile App. No fingerprint or facial template enrolment.

Illustrative QR-card scanning scene.

Your own identifier

Each person has a QR card. Replacing it doesn't require a new fingerprint or face scan.

Practical for hands-on teams

Worn or damaged fingerprints can affect recognition. Cards don't rely on fingertip condition.

Source: UK NCSC, Fingerprint recognition (2019).

Clear expectations

Explain what is recorded, who can see it, and how to handle a missed time entry or exception.

For New Zealand employers

Before using automated biometrics, assess necessity, effectiveness, lower-risk alternatives, safeguards and proportionality. Explain non-biometric options.

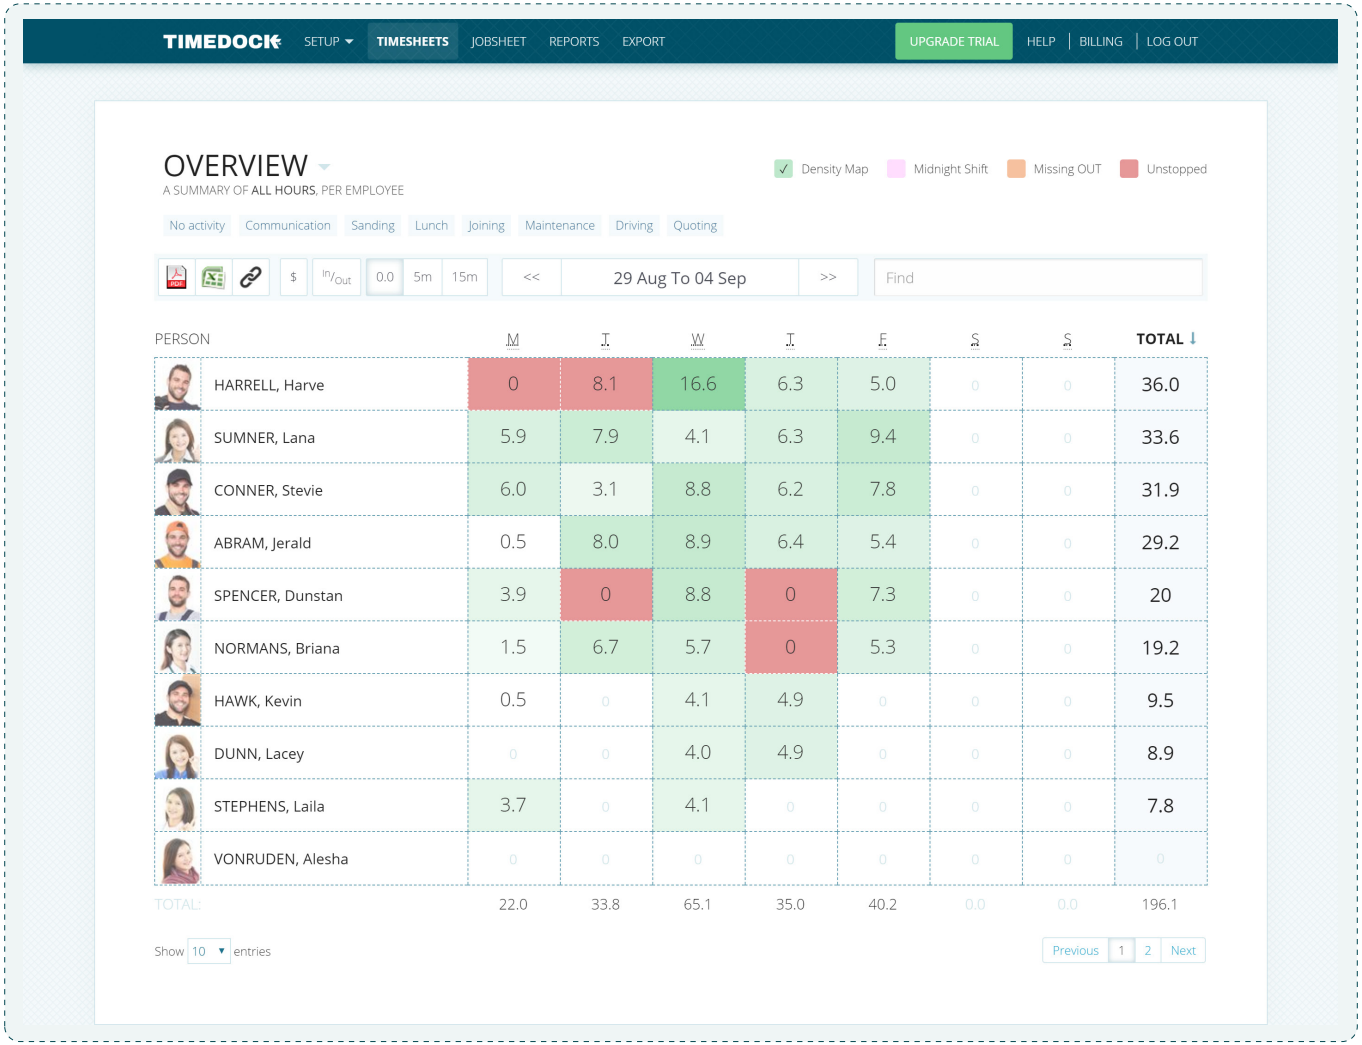

NZ Privacy Commissioner, Code rules | 29 October 2026.

Non-biometric. Still personal data.

TimeDock records employee identifiers and time entries. Explain your setup, limit access appropriately and see our personal-data guidance.

See the week. Instantly.

See the pattern of hours at a glance. Review them here. Send them to payroll.

Spot short shifts and long days.

Colour intensity helps unusual hours stand out at a glance.

Easy to investigate

Review an employee's time entries when something needs a closer look.

Send approved hours to payroll.

Connect directly to supported payroll systems, or export approved hours in more than 60 payroll import formats.

"They're brilliant, very easy to talk to, and they explain things simply."

KAT PARKER / COZY NZ

Keep your payroll. Skip the manual entry.

Review the hours in TimeDock, then send them to a supported payroll app or export format.

1

Review the working week

Check the recorded hours and underlying time entries. Review anything unusual before approval.

2

Send the approved hours

Use a supported payroll connection or export approved hours in more than 60 payroll import formats.

EXAMPLES FOR NEW ZEALAND

Xero Payroll, MYOB Payroll, PaySauce, Smartly and more.

30+ SUPPORTED OPTIONS IN NEW ZEALAND

Select the job at the Machine, then review the hours online.

See where the time goes, as well as how much.

Track work against jobs, projects and activities so the office can understand labour time as well as prepare payroll. Need a particular export? Tell us about it and we will confirm the options.

Set up the crew. Start scanning.

Start with compatible phones and the people who will use them. We can help you get going.

1

Create your TimeDock account

Add your employees and set up the team leaders who will record the team's time.

2

Prepare phones and QR cards

Install the Mobile App on compatible iPhone or Android devices and prepare each person's QR card.

3

Scan at the start and finish

Show team leaders how to scan the team, then open the Dashboard to review and approve the hours.

No Machine purchase required.

Use mobile on its own, or add a pre-paired Machine later for your regular workplace.

Real people, ready to help with setup and everyday questions.

Clear costs. A simpler working week.

Start with the Mobile App. Add a Machine only if you need one.

ACTIVE EMPLOYEES	MONTHLY SUBSCRIPTION EX GST
10 people	NZ **$64**
20 people	NZ **$105**
50 people / 2 sites	NZ **$224**
200 people / 4 sites	NZ **$675**

Prices exclude GST and shipping. Bundled employee quotas are billed monthly in advance; extra active employees are charged at the plan rate. Machine quantities are illustrative. Optional services are quoted separately. Prices stated as at 29th October 2026.

Add a Machine later.

NZ $1,150 each, as a one-off hardware purchase. Use it alongside the Mobile App in the same account.

People, not phones.

These examples are based on active employees. Choose the phones and docking points that work for your team.

A dedicated, mounted Machine keeps docking separate from personal devices and everyday apps.

Let's confirm the right setup for you.

Tell us your team size, locations and payroll.

sales@timedock.com
timedock.co.nz

Built here. For real working days.

100% New Zealand based. Helping working teams here and around the world.

It started with a practical problem.

Founder Le-roy Staines started TimeDock in 2012 to make time recording easier for working teams. The business began with mobile clocking and grew into a connected system of Machines, phones and online timesheets.

"It takes less than a minute to upload the information to payroll and Xero."

RACHEL LANE / JOINPRO

Fast answers. A real team behind them.

We develop the software and our own TimeDock Machines, and help customers use them. From choosing a setup to everyday questions, you can reach real people by phone, email and chat.

Automated help is available around the clock. Our team reviews every response and follows up when needed.

2012

TimeDock begins with mobile clocking.

2014

First cloud-connected Machine.

2021

Xero Payroll connection launches.

2022

NZ Xero App Partner of the Year finalist.

Tell us your team size, locations and payroll.

We will help you confirm your next step.
